

KAUSAL

PREVENT DOWNTIME THROUGH ROOT CAUSE ANALYSIS WITH ENGINEERING-LED AI

FROM DATA TO KNOWLEDGE

40% reduction in downtime - identify & prevent failures before they occur

Capture and preserve plant knowledge to understand true root causes

Reduce energy consumption, improve sustainability through optimal operations

Process manufacturers lose 11% of annual revenue to unplanned downtime. While existing solutions can tell you when equipment will fail, they can't prevent it from happening again. Kausal combines engineering expertise with cutting-edge AI to identify true root causes. Our unique approach analyzes complex process interactions to prevent failures before they occur. By preserving operator knowledge and providing clear, actionable insights, we help you maintain optimal performance while reducing costs.
